Jan Daugherty is the Executive Vice President of Daugherty Business Solutions, which she co-founded with her husband Ron Daugherty in 1985. Together, they've transformed Daugherty into a leading provider of solutions in the area of business intelligence, digital engagement, mobile solutions, and IT/Business process improvement for Fortune 500 corporations. Headquartered in St. Louis, Missouri, Daugherty currently employs over 1,000 professionals in Atlanta, Chicago, Dallas, Minneapolis, and Franklin Lakes, NJ.

Jan focuses on the operational aspects of the firm – currently managing the Directors who lead each of the business units. Responsibilities include oversight of the Recruiting, Delivery, Sales Support, and Administration teams. Key initiatives include the establishment of enterprise-wide, leading technology development centers, building an enhanced presales support team and improving collaboration across all business units through the Team Daugherty approach. During her tenure, Jan has also had many other roles such as managing the Mobile Solutions and Training divisions.

She's also passionate about promoting STEM initiatives and believes that technology is a terrific career choice, especially for women. In 2014, she dedicated time to helping high school girls understand what a career in technology is all about – highlighting how much can be achieved with the understanding of mathematics and how achievable it is for girls willing to make the effort.

Before starting Daugherty, Jan was a software developer and project manager for Emerson Electric and McDonnell Douglas (now Boeing). Jan is a certified PMP, has an MBA from Maryville University in St. Louis, and a B.A in Economics from Knox College in Illinois.

In her spare time, she keeps busy with her four grown children, one grandchild, and a multitude of dogs. Other hobbies include horseback riding, writing and running. Jan currently holds the Missouri State Senior record for the Women's 1500m run and will be competing at the National Senior games in Minneapolis in the summer of 2015.
